

W.H.A.C.(k). Yahtzee

The main way your team collects points every week is through Ratty Scrap games. There are two ways to gain spins. One, is I pull one Ratty Scrap out of a hat per team, and the amount of rolls of the dice is based on how many questions that person has correct. The other way is through Socratic and rolls are based on the average number of questions your team has correct.

How your points are determined:

$(1 \text{ point for each question right} * 2) + \text{Total of Dice Roll} + \text{bonus points} = \text{Team Score}$

Bonus Points

Pair = +2	3 of a Kind = +15	4 of a Kind = +30
5 of a Kind =+50	Two Pair= +8	VerySmStraight (3 in a row) = +4
Small Straight (4 in a row) = +10	Large Straight (5 in a row) = +20	Full House (3 of a kind & 2 of a kind) = +25
Very Large Straight (6 in a row) =+60	Really Full House (Two 3 of a kind or 4 of a kind and a pair) =+50	6 of a kind =+100

You can combine pairs and straights.

Ex. rolls of 2,2,3,4,5 would be a pair & small straight.
